-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

Due to the complex nature of the claims, no request for an oral election is being made. Please see MPEP 812.01.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 are drawn to a process for promoting weight loss in mammals by the administration of a therapeutically effective amount of one or more chemical compositions defined as phenolic derivatives and 1,4-benzoxazines, classified in class 514, subclasses 230.5 and 909.
- II. Claims 16-31 are drawn to a process for promoting weight loss in mammals by the administration of a therapeutically effective amount of one or more chemical composition defined as 2,3-benzoxazolinone derivatives, classified in class 514, subclasses 374, 375 and 909.
- III. Claims 32-46 are drawn to a process for suppressing appetite in mammals by the administration of a therapeutically effective amount of one or more chemical composition defined as phenolic derivatives and 1,4-benzoxazolinone derivatives, classified in class 514, subclasses 230.5.
- IV. Claims 47-62 are drawn to a process for suppressing appetite in mammals by the administration of a therapeutically effective amount of one or more chemical compositions defined as 2,3-benzoxazolinone, classified in class 514, subclasses 374 and 375.

Art Unit: 1614

- V. Claims 63-76 are drawn to a process for promoting weight loss in a mammal by the administration of a therapeutically effective amount of one or more chemical compositions defined as 1,4-benzoxazines, classified in class 514, subclasses 230.5 and 909.
- VI. Claims 77-90 are drawn to a process for suppressing appetite in mammals by the administration of a therapeutically effective amount of one or more chemical compositions defined as 1,4-benzoxazines, classified in class 514, subclass 230.5.

The six inventions are independent and distinct, each from the other as they have acquired a separate status in the art as shown by their separate subject matter for inventive effort. Further, a reference, which anticipates any one of the above inventions, would neither anticipate nor make obvious of the other inventions. Each such invention is capable of supporting its own patent. For these reasons, the restriction requirement is proper.

To be complete, applicants' response must include a provisional election even though the requirement may be traverse.

The applicants are required to elect a single invention for examination purposes.

If the applicants elect either Group II or Group IV, they must also elect a species from 6-methoxy-2,3-benzoxazoline or 5-methoxy-2,3-benzoxazolinone.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin E. Weddington whose telephone number is (571)272-0587. The examiner can normally be reached on 11:00 am-7:30 pm.
